

AIR OPERATED GREASE PUMP ACCESSORIES

Follower Plates:

The follower plate is indispensable when using heavy greases. The follower is pulled towards the bottom of the drum by the vacuum created by the pump operation and provides the following advantages:

- Keeps the grease clean and free of impurities.
- Compresses the grease which eliminates the formation of air pockets and possible cavitation of the pump.
- Insures complete emptying of the drum contents.
- Constructed of heavy duty materials with a double 'O' ring seal on the I.D. to prevent air entrainment.

Grease Drum Covers:

The drum cover keeps dust and impurities from contaminating the grease. It also keeps the pump in a vertical position and at the proper height to prevent the pump from sucking up the "bag" used in many drums.
