

POLY-TANK GRAVITY FLOW SYSTEMS

These space-saving fluid storage systems are simple, dependable, versatile and strong. All tank sizes can be stacked with each other, in any combination since the "footprint" dimensions of all tanks are the same. These tanks are rotationally molded using Natural virgin high density polyethylene (HDPE) which provides exceptional stiffness, surface clarity, UV stabilization and superior environmental stress crack resistance. These tanks are designed for use with polyethylene tolerant fluids and accessories.

The transparent polyethylene material allows you to easily see fluid levels at all times, thus eliminating the need for a separate level gauge. There is no guessing on volumes since all tanks have molded-in volume indicators, therefore eliminating product run-outs and down time.

Stackable tanks have unique molded in grooves that interlock with tanks below to secure tanks in place when stacked. These tanks are easy to set up and are user friendly. A wide range of accessories are available to allow you to configure your tank system to best fit your specific application.

Complete gravity flow tank packages are also available as shown below to allow quick and easy ordering. Secondary containment vessels in two different sizes are also available if required.

Poly Tanks Only

P/N **RTT-1110**
80 Gallon Tank, 36"L x 36"W x 18"H, 35 lb.

P/N **RTT-1210**
120 Gallon Tank, 36"L x 36"W x 27"H, 50 lb.

P/N **RTT-1310**
180 Gallon Tank, 36"L x 36"W x 39"H, 95 lb.

P/N **RTT-1410**
240 Gallon Tank, 36"L x 36"W x 49"H, 150 lb.

P/N **RTT-1510**
325 Gallon Tank, 36"L x 36"W x 66"H, 170 lb.

COMPLETE GRAVITY FLOW TANK KITS

Complete Gravity Flow Tank Kits

These 2-tank and 3-tank gravity flow tank kits have everything you need for a complete installation, Includes: Tanks, 24" stand, Drip Tray, Spring Valves, Fittings, Tubing, Hose Clamps and Thread Sealant.
