

TWO WAY OIL TRANSFER

P/N 51009C-S16

Convenient transfer cart allows you to quickly and easily extract used engine oil, gear oil, hydraulic fluid, antifreeze or other compatible fluids from engines, gear boxes, sumps or similar containers and transfer it to this large 75 gallon steel portable tank. The heavy duty 4 wheel cart provides portability of the collected fluid which can then be conveniently transferred from the portable 75 gallon tank by a simple turn of the handle on the 4 way reversing valve.

P/N 51009C-S17

Same as P/N 51009C-S16 except that this kit replaces the 75 gallon tank with a larger 95 gallon tank to provide added capacity.

SPILL CONTAINMENT PANS FOR 55 GALLON DRUMS

P/N 42073

These modular spill containment pans are injection molded polyethylene which makes them strong and durable. They can be used individually or easily connected to accommodate any number of drums. Each pan holds up to 60.5 gallons and incorporate forklift/pallet jack pockets to allow easy movement.

Grates are removable to allow compact stacking for storage when not in use.

Dimensions: 52" x 26.4" x 16.5" H, weight: 47 lb.

P/N 42073-01

A Tripod cap is used to hide the small space between pans when three pans are being connected together. These caps are used to improve appearance and housekeeping of connected pan systems and are not functionally required.

P/N 42073-02

A Quapod cap is used to hide the small space between pans when four pans are being connected together. These caps are used to improve appearance and housekeeping of connected pan systems and are not functionally required.
