

LIQUIDYNAMICS™

FLUID HANDLING TECHNOLOGY

21 GALLON USED OIL DRAINS

Avoid spills and the mess associated with collecting used oil, gear oil, differential oil, transmission fluid or engine coolant with the use of these high-quality oil drains.

These used oil drains help comply with today's exacting environmental guidelines, minimizing the risk of hazardous materials coming into contact with personnel or the environment.

Outstanding features include:

- Heavy gauge steel construction for added strength
- Powder coat finish for durability
- Handy tool tray
- Padded handle for improved comfort
- High visibility tank level sight gauge
- Convenient handle to raise and lower drain funnel
- Removable 22" collection bowl extension
- Large 6" ball bearing wheels for ease of movement
- Dry break quick connects for rapid tank emptying (24177 and 24177A Only)
- For use with external double diaphragm pump, standard w/ 24177 and optional w/ 24176
- Pressurized discharge via 6½' discharge hose w/plug to prevent drips (24176 Only)
- "USED COOLANT ONLY" decal included with all models
